

A Better Business Continuity Plan

Procovery's Multi-Disciplined Approach

About Procovery

Procovery's consultants have over 12 years experience helping organizations prepare and response to Disasters. Headquartered in Concord, California, we have consultants located around the globe. We have a proven methodology for developing cost-effective and sustainable response and recovery plans.

Procovery's Approach to BCP

Services are designed to build better Business Continuity Programs:

A Strategy to Identify and Focus on What Matters Most to the Client (brand, customer retention, financial solvency, market share, innovation, etc...)

Strong Multi-Disciplined Approach:

- Experienced **Certified Business Continuity Professionals**
- **Insurance background** to Leverage the BCP against Insurance Programs
- **CPA's** to help with Financial Planning Related to Disaster
- **Engineering** to help Reduce Losses in the First-place
- **IT Specialists** to Develop Recovery Plans for Information Technology.
- **Security Specialists** for Physical Protection and Terrorism threats.
- **Natural Hazard Specialists** to Mitigate Risks associated with Earthquake, Wind, Flood, etc...
- **Safety Specialists** to Update Safety Programs, ERT-Training, Ergonomics, Industrial Hygiene, Hazardous Materials, Environmental, etc...

Tools to Illustrate the Benefits of Business Continuity for each department in the organization

Programs to Recover the Revenue, going beyond the IT and "back-office" functions

People Recovery. Tools to help key employees stay prepared at home so they can return to work more promptly

Strategies for 7 Broad Categories of Risk:

- Facilities
- Vendors and Suppliers
